

LAUNCH

REGULAR NETWORK CONNECTION

To all dearst LAUNCH Europe users,

In order to improve the diagnosis experience and ensure the effectiveness of diagnosis, we have added the **Online Inspection** function to our diagnostic devices.

The **Online Inspection** can help to:

- Add more VIN data to improve the Intelligent Diagnosis function.
- Check and remind to update the latest APK and software to achieve the maximum functions of diagnosis.
- Check software encryption to prevent malicious piracy.
- Provide the latest information of LAUNCH Europe.

Simple method:

Just connect the device to internet for 2-3 seconds at least once every 30 days, no need to do anything else. The inspection function runs automatically in the background without affecting the normal use of devices. If the device has not been connected to the network for more than 30 days, it may affect the normal use of diagnostic functions.

Included devices:

X-431 EURO TAB II, X-431 EURO PRO 5,
X-431 EURO PRO 4 series, X431 EURO PRO
and more ...
